Chapter - 16 - Devtinder UI Part - II

1. Login Component

→ Read about state management.

→ Learn about "useState" Hook.

→ Difference b/w Javascript variables v/s state variables.

→ Read about "onchange" function.

→ Read about "onclick" handler function

→ Read about "axios package", fetch function or other ways of fetching APIs on frontend site.

→ CORS Error (Domain, Port No in backend and frontend origin differs). → use cors middleware (npm i cors)

→ Unsecure networks and why cookies doesn't set in browser (setting corsoption, credentials in backend as well as frontend). (Problem with DNS resolving),

2. Moving towards Feed

→ Read about Redux toolkit

→ Learn to create Redux Store and create different slices.

Made with Xodo PDF Reader and Editor

→ Learn about Reducer Functions
→ Provide this Redux store to our React App through Provider.

→ Redux store consist of different slices.

→ Actions and Reducers in slices.

Install Redux Toolkit
(npm i @reduxjs/toolkit react-redux)
↓
configure store
↓
Provider
↓
create slices
↓
Add reducer to store.

→ Adding data to Redux store
(dispatch an action)
: use Dispatch Hook

(use Redux dev tools for debugging the problems if arises any).

→ Subscribing to the Redux store
("useselector Hook")

→ useNavigate Hook
